Airless+ Drug Delivery Systems

Advancing Dermal Drug Delivery

Airless+ offers the pharmaceutical solution for Dermal Drug Delivery

- Precise and reproducible dosing
- Product protection
- Clean and convenient usage
- Our Airless+ range is made of 100% Medical Grade resins

Our Medical Grade resins provide a comprehensive change control package:

- ✓ Long term delivery assurance
- ✓ Full transparency of changes in manufacturing processes and materials
- ✓ Information package on resin materials

Airless+: Ensuring a superior product safety profile

Protects formulations

- Metal and elastomer-free product pathway helps prevent formula oxidation or discoloration
- Market proven self-closing actuator option prevents environmental exposure, ensuring longer product life

Safe and reliable dosing

- Safe usage is secured through reproducible and precise dosing

Child-Resistant and Senior-Friendly (CRSF)

- Easy and intuitive handling for seniors
- Prevents unintended access for children

MiniCR+

Push-and-turn-technology

NanoCR+

Innovative sleeve solution

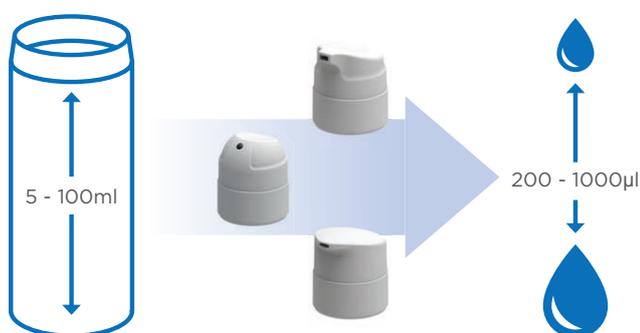

Airless+: Combining advanced design with convenience, for an exceptional user experience

- ✓ Convenient, clean use
- ✓ Reliable dispensing in any position
- ✓ Sleek ergonomic design
- ✓ Robust packaging for improved portability

Aptar Pharma's diverse Airless+ range and flexible portfolio enable brand differentiation to meet your dermal drug product needs

Container sizes

Actuator types

Dose volumes

- Extensive combination options
- Suitable for a broad range of viscosities
- Wide variety of actuator shapes and functionalities
- Customizable fill and dose volumes
- Easily adapts to existing filling lines
- Smaller size formats for on-the-go solutions

Airless+: Supporting a more sustainable solution for your dermal drug products

Our Airless+ range helps to reduce the CO₂ footprint of your dermal product with circular drug delivery solutions. Certified for excellent or complete recyclability the Airless+ product range offers also the use of renewable feedstock or bio-based materials.

Certified recyclability by cyclos-HTP
