

Aptar Pharma Enters into Partnership with Stallergenes Greer to Develop Novel Digital Health Ecosystem for Allergen Immunotherapy Treatment

Crystal Lake, Illinois, October 26, 2021 - Aptar Pharma, a global leader in drug delivery systems, services and active material science solutions, today announced an exclusive partnership with Stallergenes Greer, a global healthcare company specializing in allergen immunotherapy (AIT), for the development of a new connected drug delivery device and mobile app, the first of its kind, for patients undergoing Stallergenes Greer's AIT treatments with sublingual solutions.

Non-adherence to an AIT schedule and premature discontinuation of treatment remain a challenge in AIT management. This innovative, easy-to-use connected device will contribute to improving patient adherence to treatment, thus optimizing treatment outcomes.

Patient support programs and the provision of digital tools that place the patient first underpin Aptar Pharma's vision for the future of digital health and are a way of ensuring true patient centricity.

This partnership underlines Aptar Pharma's progress in the field of digital therapeutics, with the development work being undertaken by its Digital Health Group, which provides a full turnkey solution that includes device and software development expertise. The product will leverage Aptar Pharma's Cohero platform, which will be tailored specifically for this indication.

"We are pleased to combine Aptar Pharma's Digital Health ecosystem with Stallergenes Greer's knowledge and leading position in AIT to further improve the treatment journey of patients who suffer from allergies," said Sai Shankar, Vice President, Global Digital Healthcare Systems, Aptar Pharma.

"This exclusive partnership with Aptar Pharma demonstrates the intensification of Stallergenes Greer's investments in innovation to provide a large range of precise personalized allergen immunotherapy options adapted to the individual needs and lifestyle of patients. Stallergenes Greer is well advanced on its digital transformation journey and will continue to develop its e-health offering for the benefit of all stakeholders," added Dominique

Pezziardi, General Manager France, Belgium & Luxembourg, Global Head of Pricing and Market Access, Stallergenes Greer.

The newly-developed connected device and mobile app, part of Aptar Pharma's portfolio of digital healthcare solutions, should be available in France in 2022 and will be progressively rolled-out in Stallergenes Greer's markets.

Aptar Pharma's future digital healthcare plans include expansion into therapeutic areas such as respiratory, pain, CNS, allergy, oncology, diabetes and the evolution of its range of digital support tools.

About Aptar Pharma
